

18th Convocation

**Dhirubhai Ambani
Institute of Information and Communication Technology**

DA-IICT Road, Gandhinagar, Gujarat, India 382007.

Tel.: +91 79 6826 1700 | Fax: +91 79 6826 1710 | Web: www.daiict.ac.in

18th Convocation

Convocation Schedule

Time Activity

17.15 Guest to be seated

The President, DA-IICT has nominated

Ambassador T. S. Tirumurti, BoG member to preside over the 18th Convocation ceremony

17.30 Declaring the Convocation open by the Ambassador T. S. Tirumurti and Invocation by students

Conferment of Degrees by Ambassador T. S. Tirumurti

Award of President's Gold Medals by the Chief Guest

Address by Ambassador T. S. Tirumurti

Convocation address by the Chief Guest,

Professor Brij Kothari, a social entrepreneur who is globally known for his frugal innovation, the 'Same language subtitling (SLS)' to enhance mass literacy and founder of Book Box Inc. and Planet Read

19.45 Declaring the Convocation closed by the Ambassador T. S. Tirumurti

National Anthem

Dinner

18th Convocation

Convocation Flow

1. The procession enters the venue

The audience rises and remains standing until the Chief Guest and dignitaries are seated.

2. Declaring the Convocation open

Ambassador T. S. Tirumurti declares the Convocation open.

3. Invocation by students

4. **Dr. Tathagata Bandyopadhyay**, Director DA-IICT presents the annual report

5. Conferment of Degrees

Dean (Academic Programs) presents the candidates, in the following order of the programs, who come forward and receive the Degree individually from Ambassador T. S. Tirumurti :

- Candidates for Ph.D Degree
- Candidates for M Tech (ICT) Degree
- Candidates for M Tech (EC) Degree
- Candidates for M Sc (IT) Degree
- Candidates for M Sc (DS) Degree
- Candidates for M Des (CD) Degree
- Candidates for BTech (ICT) Degree
- Candidates for B Tech (Honours) ICT with Minor CS Degree

Candidates of all the programs rise.

Ambassador T. S. Tirumurti : " By the authority given to me by the Board of Governors, DA-IICT, Gandhinagar, I confer on you the Degree of Doctor of Philosophy/Master of Technology/ Master of Science/Master of Design/ Bachelor of Technology of DA-IICT, Gandhinagar. I also confer the said Degrees, in absentia, on those who are not present today. I charge you all that in your life, by word and deed, you prove yourselves worthy of it:'

18th Convocation

Convocation flow

Graduating Students take the pledge

"I pledge that in my life by word and deed, I will prove myself worthy of the Degree conferred upon me."

6. Signing of the Graduation Register

The Executive Registrar places the register for signature of Ambassador T. S. Tirumurti.

7. Award of the “President's Gold Medals”

Students who have been awarded the President's Gold Medals for scholastic performance and standing first in their respective programs come forward and receive the medals from the Chief Guest.

8. Address by the Ambassador T. S. Tirumurti, BoG member, DA-IICT

9. Convocation Address by Professor Brij Kothari Chief Guest

10. Convocation concludes

Ambassador T. S. Tirumurti declares the Convocation closed.

11. National Anthem

12. The procession leaves the venue

The audience rises and remains standing until the procession exits the venue.

18th Convocation

18th Convocation

The President DA-IICT has nominated Ambassador T. S. Tirumurti, BoG member, to preside over the 18th Convocation ceremony.

Ambassador T. S. Tirumurti

Ambassador T.S. Tirumurti dedicated 37 years of his illustrious career to the Indian Foreign Service, from 1985 to 2022. Notably, he served as the Ambassador and Permanent Representative of India to the United Nations in New York from 2020 to 2022, where he presided over the UN Security Council in August 2021. Before this significant role, he held the position of Secretary in the Ministry of External Affairs, overseeing affairs related to Arab countries, Africa, development partnerships, and economic relations.

Throughout his diplomatic journey, Ambassador Tirumurti left a lasting impact in various global arenas. His assignments included crucial roles in Cairo, Geneva, Gaza, Washington D.C., Jakarta, and serving as India's High Commissioner to Malaysia from 2013 to 2018. Notably, he was India's first Representative to the Palestinian Authority in Gaza from 1996 to 1998.

Within the Ministry of External Affairs, New Delhi, he handled responsibilities involving neighboring nations such as Bhutan, Bangladesh, Sri Lanka, Myanmar, and Maldives. His role as the Head of Division for the United Nations showcased his commitment to international cooperation. Ambassador Tirumurti was also India's key negotiator for Climate Change-related issues for several years.

Presently, Ambassador Tirumurti serves as a distinguished member of the Board of Governors for DAIICT, Gandhinagar. Additionally, he holds the position of Distinguished Professor at the Indian Institute of Technology Madras, Chennai.

Beyond his diplomatic achievements, Ambassador Tirumurti is also a prolific author, having penned three insightful books.

We are delighted to welcome Ambassador T.S. Tirumurti to our Convocation ceremony, where his wealth of experience and wisdom will undoubtedly inspire and resonate with our graduating students.

18th Convocation

Chief Guest , Professor Brij Kothari

Prof. Brij Kothari and his team have innovated, researched, and nationalized the use of ‘Same language subtitling’ (SLS) on Bollywood film songs on TV, for enhancing mass reading literacy in India. He laid the foundation for the SLS project as an Associate Professor at the Indian Institute of Management, Ahmedabad (IIMA) in its Centre for Educational Innovation in 2002.

Prof. Brij is an Ashoka Fellow and the President of Planet Read, a non-profit involved in scaling SLS efforts in India and other countries. He is also the CEO of Book Box Inc, a for-profit social venture producing children’s animated stories in more than 25 languages. He co-founded Planet Read.org and BookBox.com as Reuters Digital Vision Fellow at Stanford University.

Prof. Brij grew up in the Sri Aurobindo Ashram at Pondicherry and went on to get a Masters in Physics at IIT Kanpur, a Masters in Development Communication and a Ph D in Education from Cornell University. His doctoral research was on conservation of local knowledge in Andean Ecuador.

Prof. Brij has now established Planet Read to spread his work across the globe. He has been working full time on making SLS a global phenomenon to achieve mass literacy in every region by subtitling the music of other countries.

18th Convocation

Chief Guest's speech

Education, Serendipity and Purpose

I am deeply honoured to be speaking today at the Dhirubhai Ambani Institute of Information and Communication Technology (DA-IICT), one of India's finest institutes. Thank you, Board of Governors, for this opportunity. A very warm welcome to parents and families!

If you're wondering who I am or why I was chosen for this privilege, so am I. I asked my astrologer, ChatGPT, and pat came the reply, "*Sir, main bhi confusia gaya hoon. Aap to bade ordinary aadmi hain!*" Perhaps the point is to hear from an ordinary person. Ordinary people are sometimes a greater force for good when their efforts synergize. A Tsunami, after all, is made up of water molecules with gravity as its force. Graduates of DA-IICT, you are the molecules of change you want to see in this world. May you find the force. "May the force be with you."

Allow me to share some stories from my life and I hope they resonate with you.

Good happens at the intersection of education and values

I was born in Nanded, the youngest of four boys, to a Marwari baniya father and a ghoonghat sporting, semi-literate mother. My parents were migrants from traditional Rajasthan in search of a livelihood in Maharashtra. Like most parents, they wanted a good education for their children. To them, it meant a value-based education. Their search – half a century before Google – led them to Sri Aurobindo Ashram's International Centre of Education in Pondicherry. I got shipped at age six to join my brothers at a boarding school, 1000 km away from home. We absolutely loved it.

The school has no exams, all the way from kindergarten to college. The pedagogy centers around a philosophy of 'integral education.' Academic learning is rooted in developing a love for learning and not learning for tests. In practice it means small classes and progressively greater choice of subjects, teachers, and depth of study. Physical education was next level: two hours of sports every day, seven days a week, modeled after the Olympics. We participated in athletics, gymnastics, swimming and all the team sports you can imagine. Layer onto this the option of pursuing the self's inner work through music, dance, drama, meditation and, of course, an ocean of Sri Aurobindo's tomes for a lifetime of inspiration.

18th Convocation

How did my traditional parents from Rajasthan, making a simple living in Maharashtra, make such a bold decision to send us to a school so far removed from their physical, social, and cultural geography? I may never know. What I do know is that their decision gave us the gift of an education that broadened our horizons in unimaginable ways while raising our aspirations from a narrow focus on livelihood to redefining life as a search for something bigger than oneself. I am sure your time at DA-IICT will similarly impact your life in deeply positive and wholesome ways because that's what a good education does.

As your compass into the future, consider Sri Aurobindo's words, "The first principle of true teaching is that nothing can be taught." By implication, everything can be learned. Or as Yeats is thought to have said, "Education is not the filling of a pail, but the lighting of a fire." Surely, by now the fire of curiosity and imagination is raging within you for a lifetime of learning. As you will soon walk up to collect your degrees, ask yourself on that path, is that fire for lifelong learning kindled in you? If not, turn around and walk back. Parents, I'm joking. All is well.

Discovery needs a walk through serendipity

After completing my education in Pondicherry, equivalent to a bachelor's but no degree to show for, I somehow got an admission to IIT-Kanpur's master's programme in physics. Their entrance exam – including a written test and an interview – was my life's very first exam. Credit to IIT-Kanpur for even allowing me to go through their entrance process because all other IITs had refused – no degree, no marksheet, no point. Where all the IITs followed a standard script, IIT-Kanpur saw value in a school off the beaten path. Since there was anyway a two-stage entrance process, they created space for an oddball.

You will all someday be in positions of authority and the oddball will show up in the form of a person or idea that does not fit the mould. Individually or institutionally, you can take the easy route and slam the door because you have the power to. Or you can take the harder route and make a considered judgement that is flexible, even if open to some risk. My hope is that you will judiciously consider the latter sometimes. The bet that IIT-Kanpur made on me allowed me to mainstream my education and gave me an opportunity to study at Cornell University in the US.

At Cornell I chose to get another master's in communication and then a Ph.D. in education. "Wait, what happened to physics," you might ask. Quite simply, I loved the subject, but the subject did not love me back, so I pivoted. It's generally good advice to do so in academics or in matters of the heart. Speaking of the heart, even though I spent a decade at Cornell to get my degrees, in my defense, I also found two life partners: 1) a fellow-student from Kerala who seemed equally lost at the time, and 2) an idea that grew into a life obsession.

18th Convocation

The grace and ease with which my traditional Rajasthani parents accepted our Mallu-Marwari and Hindu-Christian union only reinforced for me that ‘traditional’ does not mean conservative and closed-minded, just as ‘modern’ does not automatically mean ‘liberal’ and open-minded.

The most broad-minded person I’ve ever known in my life, who could embrace difference and diversity with the ease with which she wore her ghoonghat (or did not later in life) was my mother. She prayed every day to a set of gods she inherited at birth but lived a life knowing that god is a force that is far more expansive and inclusive than any one religion. She lived Sri Aurobindo’s wisdom, and I quote, “If a religion is not universal, it cannot be eternal. A narrow religion, a sectarian religion, an exclusive religion can live only for a limited time and a limited purpose.”

Back to my other life partner – an idea I’ve been married to for the last 28 years, now widely known as Same Language Subtitling, or SLS. The story is longer than I can do justice to here and you can read about it elsewhere. What I can do is share some vignettes that served as unexpected steppingstones to my work on SLS.

It all began with a \$99 coupon in the mail from Continental Airlines for a round trip ticket from anywhere in the US to Ecuador. That was a godsend for a student who loved to travel and needed a research topic. Literally after landing in Quito, still carrying my backpack, I walked into a family restaurant downtown. Cotopaxi, breathtaking snow-capped volcano just shy of 6000 m, towered over the city. Just as I finished my lunch, Gloria, the matriarch who ran the restaurant asked me, “Where are you from?” “India,” I replied. She froze momentarily and decided that she would not charge me. Then she asked me if I needed a place to stay. As a matter of fact, I did. So, she offered a guest room at her home at no charge. That evening, over dinner with Gloria’s large family, she began narrating her story.

Several years back her daughter, who happened to be dining with us, had a brain tumor. The family scrounged for resources and somehow managed to get her to the US through a distant Ecuadorian connection who was married to an Indian surgeon. He went out of his way to help them out. The surgery went superbly, and the daughter returned to Ecuador to lead a perfectly healthy life.

Gloria had been carrying a sense of gratitude for an Indian all those years. I just happened to be the first Indian to show up at her restaurant. Gloria began calling me ‘mi hijo’ or ‘my son.’ Over several trips back to Quito from my research sites in Andean communities, mama Gloria would not let me stay anywhere but her home.

18th Convocation

In your own lives I pray that you experience the kindness of strangers. When you do, and even if you don't, pay it forward to life's fellow travelers who may be very different from you. I hope you will find your own Cotopaxis, adopt and be adopted by the rich diversity of life and love that surrounds us. Always find new ways of seeing received wisdom, and if need be, master the art of reflecting on and shedding dogmas along the way. I have shed my share of prejudices and learned a simple truth. No one is immune and we will fail the day we think we are.

My research in Ecuador was on the conservation of indigenous people's knowledge of medicinal plants. Knowledge conservation with low-literate Andean communities had its challenges. The experience drove home for me the foundational importance of strong literacy skills. We don't think about it this way, but literacy itself is humanity's greatest innovations for knowledge sharing, only about 6000 years old.

Finding life's purpose

I found my life's purpose in 1996 while writing my doctoral dissertation back at Cornell. To keep up with my Spanish, and procrastinate from writing my thesis, I liked to watch Spanish films. In those days non-English language films came on VHS tapes with English subtitles. As a student of Spanish I wanted the subtitles to also be in Spanish, to be able to catch the dialogue better. At one film viewing with friends, I had an 'aha' moment that continues to define my life. Why don't they put subtitles in Hindi, on Hindi films, Tamil, on Tamil films, and so on in all Indian languages? It will make all of India fluently literate. What seemed intuitively obvious back then, still, has not been tried for literacy anywhere in the world.

Same Language Subtitling (SLS) is simply the idea of subtitling all entertainment content on TV, films, and streaming platforms in the 'same' language as the audio. Word for word, what you hear is what you read. The logic is straightforward. More than a billion people in India, including 600 million weak-literates and 250 million non-literates, watch on average 3-4 hours of entertainment TV every day. Whenever they watch a serial, a movie, or a cartoon, the presence of SLS would automatically give reading practice to weak readers and motivate non-readers. A small change could literally put 1.4 billion Indians on a path to daily and lifelong reading practice and improvement. The cost? INR 10 per person for 70 years of daily reading. That is the colossal power of communication when a solution rides people's passion.

Einstein said it beautifully, "Imagination is more important than knowledge. Knowledge is limited. Imagination encircles the world." The SLS project imagines every Indian to be a fluent reader in their own or any language(s). In an unimaginable feat, today we've put all the world's information in every individual's palm, yet the main barrier to access has more to do with cognition rather than connectivity.

18th Convocation

Let me for a moment ask you all to close your eyes for a thought experiment. I will now take away just one of your skills. Your ability to read. How has your world changed? What has happened to your education? The value of smartphones in your pockets? Your confidence? Your dignity? 850 million Indians, the overwhelming majority female, are denied the power of fluent literacy. “Literacy” is not a label but a state of functioning. India cannot be 80% “literate” but where less than 40% can read simple texts meaningfully.

Consider the power a fluently literate India will unleash on our economy and indeed the world stage. Every individual with the opportunity to realize their full potential. I believe SLS is a solution that will encircle the world because other countries like the UK and US are adopting it with celebrity campaigns to “Turn On The Subtitles (TOTS)” on TV, aimed at children. Nearly three decades into the SLS project, surely there is an irony here and a question: Which will be the first country to scale SLS for literacy? I hope it is the innovation’s birthplace.

The evidence-based case for SLS was made at IIM Ahmedabad during my long association with the institute from 1996 to 2023. My gratitude to IIM-A for the institutional base it gave me, knows no bounds. It helped us push the Ministry of Information and Broadcasting (MIB) to frame Accessibility Standards for TV in 2019, which mandate SLS on half the entertainment content. The challenge with any policy is quality implementation. Our Billion Readers or BIRD initiative is presently aiming to implement SLS nationally on all entertainment content, in all languages, through IIT-Delhi’s School of Public Policy where I’ve begun a new chapter.

The core strategy of BIRD is simple. Ensure that the producers of all entertainment content in any language – films, on TV, and OTT – must create at source, an accompanying SLS file that has the verbatim text and time codes. The industry and techies call it an SRT file. In essence we are redefining video from audio + visuals, to audio + visuals + text. Besides the nation scale social benefits, it will make video completely searchable. We are not alone in this fight.

In a massive victory for media access, Mr. Rahul Bajaj, a blind Oxford educated advocate with two other blind and one deaf petitioners, recently persuaded the Delhi High Court to mandate SLS for the deaf and hard of hearing, and Audio-Description (AD) for the visually impaired, on the biggest blockbusters of 2023, Pathaan and Jawan. That led to MIB drafting the Accessibility Standards for films, currently in the public domain for comment. All 2000 new films that come up for certification every year, will need to submit quality SLS and AD files. Kudos to MIB for these pathbreaking policies. Massive respect to the ordinary folk bending the arc of power toward social justice.

18th Convocation

The story of SLS would be incomplete without a mention of the resistance to change. Whenever you see SLS on TV, know, as Victor Hugo said, “No army can [and in this case could] stop an idea whose time has come.” Let me illustrate with a story the kind of resistance one must face. I share it not to embarrass anyone, or score points, but rather to convey the realism of system change.

In 2009, I was invited to make a formal presentation on SLS to the Minister of Human Resource Development, the Secretary, Joint Secretary, and other senior officers. I had already worked on SLS for 13 years at IIM-A before I finally scored this opportunity. Before I could settle and open my slides, the Minister said, “Tell me what you’re going to tell me.” Not sure what to make of it, I responded by saying, “I will talk about Same Language Subtitling (SLS) on mainstream TV for mass reading literacy.” They shot back (no, I’m not giving away their gender): “This has nothing to do with literacy, you go somewhere else.” They then asked me to leave. I was stunned. It did not matter that a professor from one of India’s finest institutes had travelled from Ahmedabad to Delhi, to make a presentation on an innovation he had worked on for over a decade. Raw power could THAT easily trample someone’s efforts. I don’t think I ever felt smaller or more humiliated. The setback was huge because after that all the senior officers in the ministry would just not entertain any conversation around SLS. But look, the Minister is gone, and the idea persists.

Eighteen months later the NASSCOM foundation selected our SLS project for a prize. At a glitzy ceremony in Delhi, I once again had the honour of coming face to face with the same Minister. They gave me the prize and graciously said, “Congratulations! Keep up the good work.” However, they did not open the door for a follow up conversation. Yes, I tried.

By virtue of your education, you will all rise to positions of power – the power to nurture what’s good and to prune what’s not. Despite your best intentions, sometimes you will err. That’s when you will need the power of humility to accept mistakes and make amends. The Minister in question did not have the grace. I hope you will. DA-IICT’s class of 2024, my desire for you is that you too create innovations, stumble on ideas that do good in this world, and persist through walls of resistance because they will crack and crumble. Make your purpose bigger than yourself, your family, or your tribe; perhaps something that touches the entire nation and indeed all of humanity.

Dear graduates – and the parents, professors, and well-wishers who have helped you get to this point – I wish you all the professional and personal success in the world. Equally, I pray that you find a purpose that leaves this world better than you found it. Congratulations from the bottom of my heart!
